Subject: **Women Chemists Committee Student Affiliates**

Date: February 2, 2021 at 4:44:08 PM EST

Hi Everyone!

This semester we are forming a student professional organization for women in chemistry: the Women Chemists Committee Student Affiliates! As women chemistry majors, we are building this group as a space for others majoring in or taking chemistry classes here at the University of Pittsburgh.

This club is aiming to provide a safe place where women in chemistry can meet each other and discuss their experiences in the chemistry department. In addition, we hope this club can be a place where the success of all our members can be encouraged, both professionally and personally.

If you are interested in joining, please join our groupme! https://groupme.com/join_group/65628015/G53Y7LVL

And fill out this form to join our email list and let us know what day works best for meetings: **Women Chemists Committee**

And if you have any questions, feel free to email Ariana Park (arp136@pitt.edu) or Rotem Benharush (rob100@pitt.edu).
